

RESTRICTED SUBSTANCES POLICY

RESTRICTED SUBSTANCES POLICY

Chemistry plays an integral role in the creation of epic surf products. At Rip Curl, we recognise the importance of reducing the social and environmental impact of our chemical use by ensuring regulatory compliance and supporting our suppliers in meeting our high standards.

We expect all suppliers to maintain an effective chemicals management program aligned with our Code of Conduct. To assess performance, we use tools such as the Higg Facility Environmental Module (FEM) and conduct random shipment testing.

Our Restricted Substances List (RSL) outlines the chemical compliance requirements for all Rip Curl products. It is a formal agreement signed by our suppliers and forms part of the comprehensive guidance we provide on chemical restrictions.

Rip Curl's current RSL can be viewed [here](#).
